

ICE CUBE MAKERS

Exterior in stainless steel, thermoformed plastic interior.

Slide-out air filter :

- slides out easily with no need to remove the front panel;
- prevents dust formation on air condensers.

Limescale removal system:

A rubber container easy to remove, collects the limescale and residues that form in the water circuit; it allows an easy access to the pump filter for limescale removal.

Antibacterial coating

All ice cube maker models are protected against bacteria using AGION, a compound containing powdered silver. All plastics in contact with water contain AGION, sharply reducing bacteria and algae formation.
